

VIRTUAL

A classroom in a virtual videoconference setting

Who is it for?

- Individual students who want to enjoy the benefits of a traditional classroom setting but have time constraints or are not always in the same place.
- Companies located out of easy reach or willing to make up groups of employees based on different buildings or cities

What is it?

A virtual classroom set on a videoconference learning platform with all the features required for a perfect class: a shared board, screen sharing for books, video and audio broadcasts, high fidelity video transmission among participants, common and private chats among students and teacher-students

How does it work?

Students and teacher connect to the virtual classroom (on a computer, tablet or smartphone) at the established time and the class takes place as if it were a physical classroom.

Teacher and students see each other all the time and interaction takes place following the teacher's instructions.

Why use it?

Virtual offers **all the advantages of a physical classroom setting:**

- Interaction with other students
- Real- time contact with a teacher
- All kinds of materials available (books, audios, videos, board)

Plus **all the advantages of web-based courses:**

- Class can be done wherever the student is
- Possibility of flexible times
- Easy to use, accessible interface
- Classes can be recorded and all the materials saved for later use

Which courses can be done using the Virtual system?

- Standard courses
- Blended learning courses (combined with an online learning platform)
